Clarkdale Will See Improvements to Centerville Road/Avenida Macias Intersection This Week

Clarkdale, AZ (July 31, 2013) – During the second and third quarters of 2012, the Town of Clarkdale conducted several neighborhood meetings and surveys relating to continued access through the intersection at Centerville Road/Avenida Macias. While several steps were taken over the past year to address concerns brought forward by residents, the Town also committed to secure property necessary to make the intersection more functional. As a result, the Mountain Gate Development Agreement was amended earlier this year and it required the new developers of the project to make improvements and widen the intersection.

Residents that use the road will see construction mobilization beginning on August 1, 2013 and construction grading starting on August 5, 2013. Completion of the improvements is anticipated within 60 days, and is being undertaken by BC Land Group, the developers of the Mountain Gate Subdivision.

Long term, the Town of Clarkdale continues to plan for Centerville Road to be extended on the north side of the Centerville Subdivision so that it will have a direct connection to State Route 89A. That road extension, which is called for in the Clarkdale General Plan, is also a requirement of the Mountain Gate Development Agreement and will take place at later stages of the development.

For questions about this project, please contact the Clarkdale Public Works Department at (928) 639-2550.
