Attention- Groundwater in Clarkdale-today and in the future

Do you ever wonder where the water flowing out of your faucet comes from? Do you worry one day the flow will stop? Are you curious about how rainfall and drought impact the availability of the water you use? If so, come to the second meeting regarding the ongoing Water Resource Management Program in Clarkdale on August 7, 2013 from 5:30 – 7:00 p.m. in the Men's Lounge of the Clark Memorial Clubhouse.

Laurel Lacher of Lacher Hydrological Consulting Inc. will use the 2011 USGS model to describe current groundwater and baseflow conditions in the Clarkdale area and how they have evolved over time. Ms. Lacher and experts from the Water Resources Research Center at the University of Arizona will discuss the conditions of groundwater and surface water resources in the Clarkdale area and how these conditions are projected to change in the future.

Information from this study will be used to develop a water management plan for the Town of Clarkdale.

Questions may be directed to the Community Development Department at (928) 639-2500.

Clarkdale, AZ
